The biggest thing to really know is that it was a first net comm center. So whoever did it was really attacking the NSA. How they even knew about it is the million dollar question. They had to have already been glowing to know where to target. Add that to the shootout and message to evacuate, and you got yourself a spook war? Idk this is a lot.

there are multiple interstates around the area and those interstates have weigh stations with cameras on site. if nashville pd was able to obtain footage from anything within a 25 mile radius of the explosion, especially dashcam footage from anyone who filmed anything that day, they'd have have a good chance at getting the license plate. my theory is that the rv is from out of town so that the odds of getting away with this would be better.

AT&T centre is in a building owned by Cerberus Capital. Cerberus Capital also owns Dominion Voting Systems. This is a terrorist attack by a right-wing Trumptard thinking they're "attacking the Dominion servers".

Anonymous ID:0o9GThOM Sat 26 Dec 2020 07:11:46 No.298631349 Report

Quoted By: >>298631735 >>298631911

Do any of you recall the roumors of an NSA CIA shoot out at the Titanpoint building at 33 Thomas Street in jewyork in 2016, just after the elections? As I recall a doctor reported that he had to treat 3 CIA spooks gunshot wounds, there was never any mention in the lamestream media. This is all I can find that about it:

https://conspiracydailyupdate.com/2017/01/05/dr-william-mount-cia-attacks-nsa-in-manhattan/

In my opinion this was most likely a right wing lonewolf or group, the bomb doesn't appear to be ANNM, by now they should know what compound it was, this would be interesting information. I rule out leftist, muzzies, niggers and glowniggers, due to the warning coming from the device, I'm aware that lefties have used this tactic in the past, but I don't think any of these groups care about the loss of life. The rifle fire was to wake people up so they could hear the message from the RV, whoever parked the vbied knew the loud speaker would probably be ignored otherwise, a mag dump would get their attention, summarily the police showed up and heeded the warning. This was not to lurer the police in, otherwise there would not have been a warning.

it looks like the RV left no crater at all, yet there's clearly damage to the building below ground level. i can't be arsed to get the pics but they've been posted on here numerous times.
anyway it points to the real bomb being inside the basement of the building and the RV explosion was just the distraction

It's weird that we have so little info. Like it's intentional. I'm not shitting on any hypothesis out there.
A /pol/'s poll from yesterday's morning and throughout the day shows that the board is basically thinking it's most likely the three letter glowniggers. How? Anyone's guess.

The guy who posted the video of the countdown is suspicious AF. Other than that, there isn't much known. I do wonder if the info to build a bomb that would do that much damage is readily available online. Even with the bomb info in hand, you would need some privacy to set it all up. A mad Boomer -the type that was into Ham radio and computers could probably pull this off - and he probably already owned an RV.

Ok, time to tell MY story fuckers.

My wife has been allegedly importing cocaine into this country via a network of shady lawyers. I'm pretty sure the reason she won't fuck me is because she doses me with drugs to make me sleep so she can go out and do witch spells on rich dudes to fund her empire. She's from Ireland so I don't know anything about witches because I live in the US (Decatur, GA in fact.)

She recently abducted my two sons, James Huckleberry Hawkins (3) and Theodore Wyatt Hawkins (1) and is residing somehere in the Atlanta, GA area.

She had me committed to a mental institution when I caught on to her, but fortunately I was able to get clear at the Anchor Hospital near the airport in Atlanta.

All my friends have sided with her, specifically the Swope family headed by Matthew and Orren Swope in Newnan, GA who are also in posession of my firearm (a Sig Sauer SP2022) and my GA carry license. His dad is Steven Swope who may have some connection to the cocaine being flown into Atlanta thru Augusta (rumor is at Anchor hospital at least.)

I'm just hoping to see my children again. It's been a tough Christmas and I could use some friends. I've been hunkered down here in Decatur because everyone is currently afraid to look me directly in the eye and tell me wtf is going on.

Also I'm pretty sure my sister, Kara Hawkins is also involved and has somehow tricked her into becoming a lesbian.

Reddit has banned me and my bitch mother has been limiting my access to info somehow via ATT.

Hope you guys can help.

-DPH

PS: NUTS.

there was an explosion underground that damaged the sublevels of the building which doesn't make sense if it was just a car bomb.

it's getting into speculation from here, but maybe someone either got access to the basement and blew it up, or put a big ass bomb in an adjacent tunnel, maybe directional or something, to penetrate what i assume would be the server rooms

ok so here it is faggots..Sneed it and weep!! I believe Nashville bombing is from Q.

Infographic related.

QRD

>Helper says unimageable things gonna happen and communication from Q will be cut.
>Says not to believe MSM
> Last post from Q is 12/8/20
> today is 12/25/20 exactly 17 days from the 8th
>Last Q post is a video of the song "were not gonna take it"
>literally 2 seconds in there is a car bomb blowing up
> vid here https://www.youtube.com/watch?v=O1l-nR1Apj4
> police are called in to area with a report of a shooting at 5:17
>last Q post was 17:05
> when they get there there is no shooting
> MSM narrative is that the police noticed a weird van
> in reality - we have a video here https://streamable.com/pwqspa that shows a loud speaker saying to evacuate the area
> thats when the police started telling people to evacuate
> bomb them goes off at the time and date when nobody would be out on the street

> nearby there is an AT&T building that is also used by NSA for communications
> Fox news commentator and news anchors here are dumbfounded https://streamable.com/y5g935
> they speak about how this doesn't fit the MO of a terror attack
> "its almost like they wanted to warn the cops and nobody to get hurt"

I don't care if you have been a long time staunch enemy of Q, the similarities are too much to ignore.

Guys, the bombing isnt the happening, If this truly was a Q operation, the true happening is that there are freedom fighters and they just declared war.

Previous Thread that produced this information >>298489779

Again I could be wrong but atleast I have a theory

I'm going to throw this out here, not suggesting this is the same, but interesting nonetheless.

In this article regarding the assassination of Lebanese Prime Minister Rafik Hairiri in 2005. Allegedly his convoy was hit by a miniature tactical nuke, evidence seems to back up that it was a nuclear device, brief but intense heat, bodies chared on one side, but not the other, clothes intact, etc.
Link to article:

https://www.voltairenet.org/article167553.html

After some research I found this article from 2006 on the subject.

https://usiofindia.org/publication/usi-journal/impact-of-nanotechnology-on-nuclear-weapons-2/

I've done a lot of research into nuclear physics while learning about CERN, I never saw anything about nanotechnology. One thing I found interesting is that all coliders world wide have been producing antihydrogen since 1959, guess we know why

I went back and looked at it a few times. I think the plume you are seeing is probably a result of the initial explosion. If you look at the video, the area changes tone in an arc right before the whatever it was goes shooting off to the right, then there is a plume. Given the lack of cratering, and the other damage it did create, it seems this bomb was designed to produce maximum lateral pressures. I can also see this explosion lifting manhole covers as opposed to a secondary underground explosion. Who knows, these are just guesses. Just saying I don't think it was a missile and I don't think it was a MIGA redneck amateur. It looks very specific and very, very professional.

I was wondering if they used Manhole covers. There are a bunch of manhole covers in a cluster outside of the building (pic related). Do you use the camper to obscure entrance to the manholes? I assume the manholes give access to the natural gas line. Was the explosion not a bomb, but a manufactured gas line explosion?

https://twitter.com/Joseph_M_Brown/status/1342552291145117697

The “evacuate now” warning is a common tactic by groups that want to destroy property and project strength to enemies (usually the state) while communicating restraint to potential civilian supporters.

The warning is a way out of what I call the “multiple audiences conundrum” (wanting to use violence to impress your foes without looking too brutal to civilians whose support you might need).

All terrorist groups face a multiple audience conundrum, but it’s especially acute for groups with no territory (who have to hide among civilians) and groups fighting democracies (where civilians have high standards of acceptable humanitarian behavior).

Good point. However, there are manholes that were made tamper resistant, possibly welded at some point. Notice the three spraypainted markings on pic related. They are used in NYC for example when the president comes to town. They spray paint the markings, because it is impossible to line them up again if you remove the manhole.

Probably I am wrong, it was just a thought.
